SUMMARY

Skilled, educated, and solution driven developer excelling in collaborative work environments, and finding solutions to challenges.

Looking for an opportunity working for a well-established organization appreciating dedication and hard work. With proven experience developing consumer-focused web sites using HTML, CSS, PHP and Javascript. While ensuring compatibility across desktop and mobile devices. Always striving to meet the highest standards for web design, best practices, user experience, usability and speed.

SKILLS

Some technologies used in my current position:

React	CSS	AWS Services	SQL / NoSQL
NodeJs	Bootstrap	SSH / CLI	Graphql
Javascript	Sass	Gatsby	Wordpress
HTML	Python	Netlify	Ghost

EXPERIENCE

Lauder Media Inc, Victoria BC — *Web Developer*

May 2018 - August 2019

Designed, implemented and monitored web pages and sites for continuous improvement

Converted mockups into HTML, Javascript, JSON

Used programming capabilities in Javascript, Python, SQL and other libraries as needed

Researched new technologies, software packages for use in products development

Tested and preformed troubleshooting prior to deployment

Designed sites to be compatible with top browsers including Google, Firefox, and Safari

Implemented Google campaigns and SEO for various websites

Camosun College, Victoria BC — *Lab Assistant*

November 2016 - June 2018

Assisted first year students with various tasks including troubleshooting labs / projects, pair programming techniques, reinforcing learned material etc..

EDUCATION

Camosun College, Victoria BC — *Information and Computer Systems Technology Diploma*

Sept 2016 - June 2018

PROJECTS

BusinessPro

Affiliate Marketing Website

JAM Stack - Built with Gatsby, React and hosted on Netlify. Implements SEO and other tracking. Using a headless cms and Graphql to collect data for populating pages.

PayrollPro

Affiliate Marketing Website

Second version is built the same as BusinessPro above. The first version was built with Wordpress, using AWS EC2 instance for hosting and RDS running MySQL for data storage.

ABGames

Game Portal Website

Similar to Steam and Origin, This site was built with Python and Django and also hosted using AWS services.

Search Helper

Chrome Extension

Built with NodeJs this replaces the default chrome home page with a custom search bar with links to google apps below. Download is hosted on an AWS S3 bucket.
